TransPerfect

Position: React Developer
Location: Hanoi, Vietnam

OVERVIEW

Join the dynamic team at Translations.com, a global leader in website localization, software localization, and professional translation services. We are seeking mid-level Java developers to work on innovative web-based applications, focusing on the development of localization plugins and connectors for various platforms.

This position is ideal for developers who enjoy a startup-like environment within a well-established company. You will be part of our global engineering team, contributing to our leading-edge localization solutions.

DESCRIPTION

The role of the Front-End Developer consists of writing the React code and implementing the UX/UI team design and specifications. The Front-End Developer designs and writes the Front-End code in pairs with a Full-Stack Developer (Tech Lead), or other Front-End Developers (pair programming). The Front-End Developer works closely with Back-End Developers to ensure optimal data flow and compliance with the highest security standards. The Front-End Developer time allocation is as follows; 90% working on code for user stories, and 10% working with UX/UI Designers and QA support.

KEY RESPONSIBILITIES

- Be a part of a global team working on Front-End development using modern JS libraries/frameworks.
- Lead Front-End integrations, working with other developers and product owners.
- Work closely with UX researchers and UI designers on designing high-quality apps.
- Follow a strong security awareness and ownership culture using SDLC principles/methodologies.
- Responsible for debugging within a complex environment that includes multiple connected systems.
- Ensure that the Front-End enables best-in-class user experience and response time.
- Ensure the reusability of all the components developed.

REQUIRED SKILL AND EXPERIENCE

- Bachelor's degree in computer science or equivalent
- Proficiency in JavaScript and TypeScript
- Experience working with the React library as a Developer.
- Experience with architecture, design, development, deployment, testing, and integration of enterprise-wide applications using React.
- Experience with other frameworks like Vue and Angular.
- Experience/knowledge of consuming REST APIs using JavaScript.
- Experience implementing wireframe designs created in Figma by the UX team.
- Experience with a wide variety of continuous integration and source control tools.
- Proven track record of successfully implementing all project life cycle stages from requirements implementation and enhancements.
- Working experience in test tools like Jest, Enzyme, and React testing library.
- Working experience with development tools like Git and JIRA.

WHERE YOUR CAREER IS GOING:
